

743 Iona Rd. Idaho Falls, ID 83401, (208)529-0244 Fax (208)529-9000

Part #32-412

2 – tunnel suspension mounting plates
2 – running board to plate support brackets
6 - #7515482 bolt
6 - #7542423 nut

Note: Installation of this universal kit will vary greatly depending on the chassis, suspension and what mounting procedures that you are trying to accomplish for your particular combination.

1 - Mount the suspension mounting plate in the location that suits your application with one each of the bolts and nuts included as well as your choice solid rivets or ¼" stainless steel pop rivets (not included)

2 – Position the angled running board support bracket flush on the bottom of the running board and centered to the suspension mounting plate. Using the two holes in the running board support bracket as a guide, drill two 3/8" holes in the suspension mounting plate.

Note: Guide holes are provided that can be drilled in the suspension mounting plate for additional locations for bolting the suspension mounting plate to the running board support bracket.

3 – Mount the angled running board support bracket to the suspension mounting plate with two of the bolts and nuts included and to the running board with solid rivets or 1/4” stainless steel pop rivets (not included) to increase support and stability to both the running board and plate.
