RZR Door Seal Kit Part #67-158

- 1-Clean surface thoroughly. Must be clean, dry, and free of oil and grease. Use a clean rag with a 50/50 alchohol / water solution to clean the surface.
- 2-Avoid getting adhesive dirty. Peel liner just prior to application.
- 3-For best results cut the foam rubber seal into sections to cover each flat section of the door groove. Hold each section in place with the door closed before applying it to find the best placement.
